ABOUT IKMIB

Our Vision

...is to direct and assist the Turkish chemicals and chemical products sector to become a leading country in the global chemicals trade.

Our mission

...is to develop and implement strategies to increase the share of the Turkish chemicals and chemical products exporters in global markets and maintain a sustainable global competitive strength.

Our values

...are quality, reliability, continuous improvement, and innovation.

Istanbul Chemicals and Chemical Products Exporters' Association (IKMIB) was established in 1991 as the leading representative of Turkish exporters in the chemicals and chemical products industry. The Association covers officially over 17,000 exporters in chemical industry on a national scale and around 7,000 of them are active members and export around the world. Our association renders service as being allied with the Secretariat General of Istanbul Mineral and Metals Exporters' Association under the Turkish Exporters Assembly (TİM), as being ultimately affiliated to Republic of Turkey Ministry of Trade.

As İKMİB, we carry out activities to sustain the professional ethics and cohesion of Turkish export companies in the chemicals industry, increase export levels, diversify export products and increase products' competitiveness. We also defend our members' rights and interests, help them form strong relations in the international arena and support them in getting into new markets.

Our association continues the organizational work in Turkey with primary goals of being in close relationships with all the sub-sectors of the chemicals industry, following new developments and innovations in the sector closely and engaging new customers overseas.

Turkish Chemicals & Chemical Products Export

Before 2019, Turkey's chemicals sector was the third-largest exporting sector; however, in 2020, it ranked **second for the country** behind the automotive industry. The largest sub-sector is plastics, followed by mineral fuels, oils and products, inorganic chemicals, essential oils, perfumery, cosmetics, pharmaceutical products, rubber, miscellaneous chemical products, dyes and paints, soap and washing product, organic chemicals, fertilizers, glues, and several other sub-sectors.

Our sectoral export includes approximately **230 countries and regions**. Turkish chemical exports' **primary market is Europe** which accounts for around 40% of total chemical exports. We work closely with, and have great connections with the EU. Outside of Europe, our most significant markets are Near Asia and Middle East Region, the other European countries, North African and other Asian countries. However our exporters have different focuses for new markets, such as Latin America and Africa. For Latin America, we have B2B connections and use these relationships to test products in the market.

According to ITC-Trade Map data, Turkey ranks **38th in the world with 23,2 billion US Dollar** chemical industry export in 2020.

WHAT WE DO?

CHEMICAL TECHNOLOGY CENTER

Istanbul Chemicals and Chemical Products Exporters' Association (İKMİB) plans to establish in Istanbul the "Chemical Technology Center (KTM)," where the tests and analyzes needed by the chemical industry will be carried out in accredited laboratories and the R&D needs of the industry will be supported within the scope of production, export and import activities.

Thanks to comprehensive and result-oriented collaborations from academia to industry, efforts are underway to establish the center with the vision of supporting value-added, innovative, sustainable production in the sector and compatible with the changing norms in target markets and increasing the competitiveness of our exporters around the world.

REACH & Turkish KKDİK Regulations

Under the shareholdership of Istanbul Chemicals and Chemical Products Exporters' Association (İKMİB), REACH Global Services S.A. (RGS) was established in 2008 in Brussels and provides global consultancy services to companies operating in the chemicals and cosmetics sectors within the scope of the EU REACH and Turkish KKDİK regulations. As RGS Group of Companies, including RGS-Turkey subsidiary, they have been carefully providing since 2008 their professional consultancy services in the implementation of EU REACH and Turkish KKDİK/SEA regulations to more than 1.000 manufacturers in over 52 countries. For more information, please visit the web site of www.reach-gs.eu.
